FEB, 2008- 2009

## FEATURED

### **Doctor Chamber - Mid level project -1**

React JS, Express, Node JS, JavaScript, MongoDB,  
Firebase, Tailwind- CSS, Git

#### **Major Challenge:**

- ☒ JW Token was major challenge for me on this project
- ☒ Authentication was another challenging part of this project
- ☒ Unauthorize login protected on booking page
- ☒ Dont entry on booking page without valid user
- ☒ Anybody can't booking more time by one user
- ☒ If a user complete his booking then he can see his dashboard
- ☒ Finally he will complete his payment process.

#### **Overcome:**

- ☒ JW Token problem solved by my course and google
- ☒ Authentication problem solved by firebase DOC
- ☒ Payments policy solved by stripe

Please visit my git repository for details .... <https://bit.ly/3jvAyoD>

### **Doctor Chamber - Mid level project-2**

React JS, Express, Node JS, JavaScript, MongoDB,  
Firebase, Tailwind- CSS, Git

#### **Major Challenge:**

- ☒ JW Token was major challenge for me on this project
- ☒ Authentication was another challenging part of this project
- ☒ Unauthorize login protected on booking page
- ☒ Dont entry on booking page without valid user
- ☒ Anybody can't booking more time by one user
- ☒ If a user complete his booking then he can see his dashboard
- ☒ Finally he will complete his payment process.

#### **Overcome:**

- ☒ JW Token problem solved by my course and google
- ☒ Authentication problem solved by firebase DOC
- ☒ Payments policy solved by stripe

## ABOUT ME

I'm Emlak, a full-stack web application developer from Bangladesh and a Programming Content Creator on Youtube. I'm also a general job holder in a private group of companies as a Manager of Supply-chain. But I'm not interested in the general line. I love programming and I make code and commit on my GitHub profile.

## Skills & Tools

### LANGUAGES

Front -End:       HTML, CSS , JavaScript, TypeScript  
Back -End:       Node JS

### TECHNOLOGIES

UI related :       Tailwind- css, Bootstrap, Material UI,
